Preface

This volume contains a selection of papers presented at the 10th Workshop on Membrane Computing, WMC 2009, which took place in Curtea de Argeş, Romania, during August 24–27, 2009.

The first three Workshops on Membrane Computing were organized in Curtea de Argeş, Romania – they took place in August 2000 (with the proceedings published in *Lecture Notes in Computer Science*, volume 2235), in August 2001 (with a selection of papers published as a special issue of *Fundamenta Informaticae*, volume 49, numbers 1–3, 2002), and in August 2002 (with the proceedings published in *Lecture Notes in Computer Science*, volume 2597). The next six workshops were organized in Tarragona, Spain (in July 2003), in Milan, Italy (in June 2004), in Vienna, Austria (in July 2005), in Leiden, The Netherlands (in July 2006), in Thessaloniki, Greece (in June 2007), and in Edinburgh, UK (in July 2008), with the proceedings published as volumes 2933, 3365, 3850, 4361, 4860, and 5391, respectively, of Springer’s *Lecture Notes in Computer Science*.

The workshop changed its name in 2010, and the series will continue as the Conference on Membrane Computing, with the next edition, CMC11, to be held in Jena, Germany.

The tenth edition of WMC took place in Hotel Posada in Curtea de Argeş (<http://www.posada.ro/>) and it was organized by the National College “Vlaicu Vodă” of Curtea de Argeş, the University of Piteşti, Romania, and the Institute of Mathematics of the Romanian Academy, Bucharest, under the auspices of the European Molecular Computing Consortium (EMCC) and IEEE Computational Intelligence Society Emergent Technologies Technical Committee Molecular Computing Task Force, with the financial and organizational support of the Council of Argeş County and Seville University.

Being an anniversary edition of the workshop, ten researchers with fundamental contributions to membrane computing were invited to deliver talks covering important directions of research in this area. These invited speakers were: Erzsébet Csuhaj-Varjú, Budapest, Hungary; Rudolf Freund, Vienna, Austria; Pierluigi Frisco, Edinburgh, UK; Marian Gheorghe, Sheffield, UK; Oscar H. Ibarra, Santa Barbara, USA; Vincenzo Manca, Verona, Italy; Solomon Marcus, Bucharest, Romania; Giancarlo Mauri, Milan, Italy; Mario J. Pérez-Jiménez, Seville, Spain; Grzegorz Rozenberg, Leiden, The Netherlands.

Full papers associated with the invited talks or only extended abstract are included in the present volume.

The volume also contains 22 papers, most of them significantly rewritten according to the discussions held during WMC 2009. Each paper had three or four referee reports. The Program Committee consisted of Matteo Cavaliere (Trento, Italy), Erzsébet Csuhaj-Varjú (Budapest, Hungary), Rudolf Freund (Vienna, Austria), Pierluigi Frisco (Edinburgh, UK), Marian Gheorghe (Sheffield, UK), Thomas Hinze (Jena, Germany), Oscar H. Ibarra (Santa Barbara, USA),

Florentin Ipate (Pitești, Romania), Shankara Narayanan Krishna (Mumbai, India), Vincenzo Manca (Verona, Italy), Giancarlo Mauri (Milan, Italy), Radu Nicolescu (Auckland, New Zealand), Linqiang Pan (Wuhan, China), Gheorghe Păun (Bucharest, Romania, and Seville, Spain) – Chair, Mario J. Pérez-Jiménez (Seville, Spain), and Claudio Zandron (Milan, Italy).

The program of WMC 2009 also included seven papers which were submitted after the deadline; they were allocated only 10 minutes for the presentation (and are not included in this volume). A pre-workshop proceedings volume, containing all papers, was available during the workshop.

During the workshop several prizes were awarded, some of them related to the 10th anniversary of the workshop (e.g., the youngest participant, the person who participated in most editions of WMC, the author of the largest number of papers in membrane computing, the author of the first PhD thesis in membrane computing, and so on), as well as the *best paper* award.

This award was shared by two papers:

1. Andrea Valsecchi, Antonio E. Porreca, Alberto Leporati, Giancarlo Mauri, Claudio Zandron: “An Efficient Simulation of Polynomial-Space Turing Machines by P Systems with Active Membranes”
2. Petr Sosik, Andrei Păun, Alfonso A. Rodríguez-Patón, David Pérez: “On the Power of Computing with Proteins on Membranes”

The Organizing Committee consisted of Gheorghe Păun – Chair, Costel Gheorghe – Co-chair, Gheorghe Barbu – Co-chair, Paul Radovici, Ștefana Florea, Ileana Popescu, Nicolae Lazăr, Marius Hirzoiu, Ștefana Dumitrache, Raluca Județ, Ana-Mariana Margarita, Vlad Bărbulescu, and Radu-Daniel Gheorghe.

Details about membrane computing can be found at: <http://ppage.psystems.eu> and its mirror page <http://bmc.hust.edu.cn/psystems>. The workshop website, designed by Mihai Ionescu, is available at the address <http://wmc10.psystems.eu/>.

The workshop was sponsored by the Council of Argeș County, Pitești, Romania, and it was one of the events in the program of Argeș and Muscel Days, 2009. The pre-workshop proceedings volume was published (as TR 3/2009) by the Research Group on Natural Computing of Seville University, with the support of Proyecto de Excelencia con Investigador de Reconocida Valía, de la Junta de Andalucía, grant P08 – TIC 04220. Further local support by the City Hall of Curtea de Argeș and Hotel Posada is gratefully acknowledged.

The editors warmly thank the Program Committee, the invited speakers, the authors of the papers, the reviewers, and all the participants, as well as all who contributed to the success of WMC 2009. Special thanks are due to Springer for the pleasant cooperation in the timely production of this volume.

October 2009

Table of Contents

Invited Presentations

P Automata: Concepts, Results, and New Aspects	1
<i>Erzsébet Csuhaj-Varjú</i>	
Computational Nature of Processes Induced by Biochemical Reactions	16
<i>Andrzej Ehrenfeucht and Grzegorz Rozenberg</i>	
Transition and Halting Modes in (Tissue) P Systems	18
<i>Rudolf Freund</i>	
Conformon P Systems and Topology of Information Flow	30
<i>Pierluigi Frisco</i>	
Formal Verification and Testing Based on P Systems	54
<i>Marian Gheorghe, Florentin Ipate, and Ciprian Dragomir</i>	
A Look Back at Some Early Results in Membrane Computing	66
<i>Oscar H. Ibarra</i>	
From P to MP Systems	74
<i>Vincenzo Manca</i>	
The Biological Cell in Spectacle	95
<i>Solomon Marcus</i>	
Energy-Based Models of P Systems	104
<i>Giancarlo Mauri, Alberto Leporati, and Claudio Zandron</i>	
A Computational Complexity Theory in Membrane Computing	125
<i>Mario J. Pérez-Jiménez</i>	

Regular Presentations

Evolving by Maximizing the Number of Rules: Complexity Study	149
<i>Oana Agrigoroaiei, Gabriel Ciobanu, and Andreas Resios</i>	
On Reversibility and Determinism in P Systems	158
<i>Artiom Alhazov and Kenichi Morita</i>	
Typed Membrane Systems	169
<i>Bogdan Aman and Gabriel Ciobanu</i>	

A P System Based Model of an Ecosystem of Some Scavenger Birds	182
<i>Mónica Cardona, Maria Angels Colomer, Antoni Margalida, Ignacio Pérez-Hurtado, Mario J. Pérez-Jiménez, and Delfí Sanuy</i>	
Metabolic P System Flux Regulation by Artificial Neural Networks	196
<i>Alberto Castellini, Vincenzo Manca, and Yasuhiro Suzuki</i>	
A Novel Variant of P Systems for the Modelling and Simulation of Biochemical Systems	210
<i>Paolo Cazzaniga, Giancarlo Mauri, Luciano Milanese, Ettore Mosca, and Dario Pescini</i>	
Implementing P Systems Parallelism by Means of GPUs	227
<i>Jose M. Cecilia, José M. García, Ginés D. Guerrero, Miguel A. Martínez-del-Amor, Ignacio Pérez-Hurtado, and Mario J. Pérez-Jiménez</i>	
Regulation and Covering Problems in MP Systems	242
<i>Giuditta Franco, Vincenzo Manca, and Roberto Pagliarini</i>	
(Tissue) P Systems with Hybrid Transition Modes	252
<i>Rudolf Freund and Marian Kogler</i>	
An Overview of P-Lingua 2.0	264
<i>Manuel García-Quismondo, Rosa Gutiérrez-Escudero, Ignacio Pérez-Hurtado, Mario J. Pérez-Jiménez, and Agustín Riscos-Núñez</i>	
Characterizing Tractability by Tissue-Like P Systems	289
<i>Rosa Gutiérrez-Escudero, Mario J. Pérez-Jiménez, and Miquel Rius-Font</i>	
Searching Previous Configurations in Membrane Computing	301
<i>Miguel A. Gutiérrez-Naranjo and Mario J. Pérez-Jiménez</i>	
Modelling Signalling Networks with Incomplete Information about Protein Activation States: A P System Framework of the KaiABC Oscillator	316
<i>Thomas Hinze, Thorsten Lenser, Gabi Escuela, Ines Heiland, and Stefan Schuster</i>	
Solving NP-Complete Problems by Spiking Neural P Systems with Budding Rules	335
<i>Tseren-Onolt Ishdorj, Alberto Leporati, Linqiang Pan, and Jun Wang</i>	
Tuning P Systems for Solving the Broadcasting Problem	354
<i>Raluca Lefticaru, Florentin Ipate, Marian Gheorghe, and Gexiang Zhang</i>	

An Improved Membrane Algorithm for Solving Time-Frequency Atom Decomposition	371
<i>Chunxiu Liu, Gexiang Zhang, Hongwen Liu, Marian Gheorghe, and Florentin Ipate</i>	
A Region-Oriented Hardware Implementation for Membrane Computing Applications	385
<i>Van Nguyen, David Kearney, and Gianpaolo Gioiosa</i>	
Discovering the Membrane Topology of Hyperdag P Systems	410
<i>Radu Nicolescu, Michael J. Dinneen, and Yun-Bum Kim</i>	
A Note on Small Universal Spiking Neural P Systems	436
<i>Linqiang Pan and Xiangxiang Zeng</i>	
On the Power of Computing with Proteins on Membranes	448
<i>Petr Sosík, Andrei Păun, Alfonso Rodríguez-Patón, and David Pérez</i>	
An Efficient Simulation of Polynomial-Space Turing Machines by P Systems with Active Membranes	461
<i>Andrea Valsecchi, Antonio E. Porreca, Alberto Leporati, Giancarlo Mauri, and Claudio Zandron</i>	
Look-Ahead Evolution for P Systems	479
<i>Sergey Verlan</i>	
Author Index	487
