

Carlos Martín-Vide Gheorghe Păun
Grzegorz Rozenberg Arto Salomaa (Eds.)

Membrane Computing

International Workshop, WMC 2003,
Tarragona, Spain, July 2003
Revised Papers

Contents

Preface	v
Proton Pumping P Systems	1
<i>Artiom Alhazov, Matteo Cavaliere</i>	
A Binary Data Structure for Membrane Processors: Connectivity Arrays	19
<i>Fernando Arroyo, Juan Castellanos, Carmen Luengo, Luis F. Mingo</i>	
Parsing with Active P Automata	31
<i>Gemma Bel-Enguix, Radu Gramatovici</i>	
Universality of Minimal Symport/Antiport: Five Membranes Suffice	43
<i>Francesco Bernardini, Andrei Păun</i>	
Collapsing Hierarchies of Parallel Rewriting P Systems Without Target Conflicts	55
<i>Daniela Besozzi, Giancarlo Mauri, György Vaszil, Claudio Zandron</i>	
Evolution and Observation: A New Way to Look at Membrane Systems	70
<i>Matteo Cavaliere, Peter Leupold</i>	
Tiling Rectangular Pictures with P Systems	88
<i>Rodica Ceterchi, Radu Gramatovici, Nataša Jonoska</i>	
Simulating Boolean Circuits with P Systems	104
<i>Rodica Ceterchi, Dragoş Sburlan</i>	
P Systems Running on a Cluster of Computers	123
<i>Gabriel Ciobanu, Guo Wenyuan</i>	
Implementing in Prolog an Effective Cellular Solution to the Knapsack Problem	140
<i>Andrés Cordón-Franco, Miguel A. Gutiérrez-Naranjo, Mario J. Pérez-Jiménez, Agustin Riscos-Núñez, Fernando Sancho-Caparrini</i>	
On the Dynamics of PB Systems: A Petri Net View	153
<i>Silvano Dal Zilio, Enrico Formenti</i>	
P Systems Generating Hexagonal Picture Languages	168
<i>K.S. Dersanambika, Kamala Krithivasan, K.G. Subramanian</i>	
A Membrane System for the Leukocyte Selective Recruitment	180
<i>Giuditta Franco, Vincenzo Manca</i>	

P Systems with Cutting/Recombination Rules Assigned to Membranes	190
<i>Franziska Freund, Rudolf Freund, Marion Oswald, Maurice Margenstern, Yurii Rogozhin, Sergey Verlan</i>	
ω -P Automata with Communication Rules	202
<i>Rudolf Freund, Marion Oswald, Ludwig Staiger</i>	
The Number of Membranes Matters	217
<i>Oscar H. Ibarra</i>	
An Agent-Based Behavioural Model of Monomorium Pharaonis Colonies	231
<i>Duncan Jackson, Marian Gheorghe, Mike Holcombe, Francesco Bernardini</i>	
Can Hyperbolic Geometry be of Help for P Systems?	239
<i>Maurice Margenstern</i>	
A Linear-Time Solution to the Knapsack Problem Using P Systems with Active Membranes	248
<i>Mario J. Pérez-Jiménez, Agustín Riscos-Núñez</i>	
A Reconfigurable Hardware Membrane System	267
<i>Biljana Petreska, Christof Teuscher</i>	
P Systems and Petri Net	284
<i>Zhengwei Qi, Jinyuan You, Hongyan Mao</i>	
Simulation of Mobile Ambients by P Systems. Part 1	302
<i>Vladimir Rogozhin, Elena Boian</i>	
Computing Partial Recursive Functions Through Transition P Systems	318
<i>Alvaro Romero-Jiménez, Mario J. Pérez-Jiménez</i>	
P Systems with External Input and Learning Strategies	339
<i>José M. Sempere</i>	
A Distributed Simulation of Transition P Systems	355
<i>Apostolos Syropoulos, Eleftherios G. Mamatas, Peter C. Allilomes, Konstantinos T. Sotiriades</i>	
About Splicing P Systems with Immediate Communication and Non-Extended Splicing P Systems	367
<i>Sergey Verlan</i>	
Author Index	381
